

FLUSSO™

TFI

To Enable a Safer Circuit Disconnect

Made in Canada

MMSI
McARTHUR
MEDICAL SALES INC.

Flusso™ TFI allows for temporary interruption of gas flow to maintain a patient's positive end expiratory pressure (PEEP) and minimize potential exhaled aerosols during ventilator circuit disconnect.

Flusso™ Highlights:

- Lightweight
- Clear housing permits visualization of function
- Low deadspace (1.86 cc)
- Compact
- Minimal effort to activate
- Safety tabs to prevent over compression

Product Code: 420-1979; 25/case
